JUNGHANS - DIE DEUTSCHE UHR

JUNGHANS – THE GERMAN WATCH

Many congratulations on your purchase of a timepiece from Junghans.

What began in 1861 with the founding of the firm in Schramberg quickly developed into one of the most fascinating success stories of the German watchmaking industry. While since that time the demands made of watches may have changed, the Junghans philosophy has always remained the same. Innovative flair and the constant pursuit of precision right down to the smallest detail define how the company works and thinks. You can see and sense this in every watch that carries the Junghans name. For as diverse as the Junghans range may be, it pursues one single goal: to combine traditional craftsmanship with cutting-edge watch technology and exciting design. That makes every watch with the Junghans star unique.

We hope you will enjoy this very special time-keeping instrument.

Yours,

Uhrenfabrik Junghans GmbH & Co. KG

Operating elements and functions Calibre J815.1

Winding the watch

In crown position A the mechanical movement can be wound by hand. The watch is fully wound after approximately 20 turns of the crown. When fully-wound, maximum accuracy and power reserve are ensured.

Attention: If you feel resistance when winding the watch, please do not force the crown any further, as this may damage the movement.

Setting the time

Pull the crown into position B. Turn the crown to set the time. After setting the time, push the crown back into starting position A.

Technical data

Hand-wound movement with subsidiary second at 6 o' clock

Calibre J815.1

17 jewels

21,600 alternations per hour

Power reserve 42 hours

Anti-magnetic as per DIN 8309

Shock resistant: Incabloc

Spring: Anachron

Balance wheel: Glucydur gilt

General information

External influences can affect the watch's waterproof qualities, which may let in moisture. We therefore recommend that you have your watch regularly inspected by your Junghans specialist. Other servicing tasks or wrist strap repairs should also be done by your Junghans specialist. Your watch is fitted with a quality wrist strap that has undergone multiple inspections in our factory. If, however, you decide to change the strap, please fit a new one of the same quality, preferably an original Junghans wrist strap. Watch and wrist strap can be cleaned with a dry or slightly moistened cloth.

NB: Do not use chemical cleaners (e.g. benzine or paint thinners). These may harm the surface.
